- RCC-M 2
- CST level Q2
- Reconciliation from RCCM to ASME BPVC III

OUR SOLUTIONS ARE INSTALLED IN ...

... POWER PLANTS AND SHIPS
(SUBMARINES & AIRCRAFT CARRIES)

TECHNICAL ADVICE

Keeping in mind that the choice of a material is of outstanding importance, ETNA Industrie makes their sales engineers available to you in order to define with you the products in compliance with your Specifications.

CUSTOMER SUPPORT

ETNA Industrie ensures the refurbishment, including: upgrade and repair of all their products. Any equipment refurbished by ETNA Industrie is considered as a new One. ETNA Industrie also offers light refurbishment kits. The Technical Support Team can provide an on-line diagnosis and proposes customized training upon request.

PROJECT MANAGEMENT

Product performance as well as meeting your deadlines are the priority of ETNA Industrie Production lines. An in-house laboratory ensures advantages in terms of reactivity and flexibility during the development process and reduces in this way the « Design to Production » time interval.

DESIGN TO YOUR NEED

This assessment starts with an analysis of your needs to finally result in a technical and commercial proposal. Moreover, ETNA Industrie's Team of engineers can ensure a technical support in order to help and assist you during your project development.

QUALITY CERTIFIED

Strict project management and optimized processes for each venture contribute to long term partnerships between ETNA Industrie, their customers and suppliers.
